Report on Student Paper Presentations and Publications (2025–2026)

During the academic year 2025–2026, students participated in academic research activities by preparing papers on contemporary issues in banking and monetary policy. These activities encouraged students to explore emerging developments in the financial sector and develop their analytical, research, and presentation skills.

1. Paper Presentation by Hemalatha S.

Title of the Paper: *Artificial Intelligence in Banking Transformation: Opportunities and Challenges*
Conference: National Conference
Organizing Institution: Department of Commerce and Management, JSS College for Women, Saraswathipuram, Mysuru
Date: 29 October 2025

Hemalatha S. presented a paper titled *Artificial Intelligence in Banking Transformation: Opportunities and Challenges* at a national conference organized by the Department of Commerce and Management, JSS College for Women, Saraswathipuram, Mysuru, on 29 October 2025.

The paper focused on the growing role of artificial intelligence in the banking sector and its potential to transform banking operations and services. The topic provided an opportunity to examine the opportunities and challenges associated with the adoption of emerging technologies in banking.

2. Paper Presentation by Bindhushree G. M.

Title of the Paper: *Recent RBI Policies and Their Impact on India's Monetary Stability*
Conference: National Conference
Organizing Institution: Department of Commerce and Management, JSS College for Women, Saraswathipuram, Mysuru

Bindhushree G. M. prepared a paper titled *Recent RBI Policies and Their Impact on India's Monetary Stability*. The paper focused on the role of the Reserve Bank of India (RBI) in maintaining monetary stability through its policy measures.

The topic addressed the significance of monetary policy in managing inflation, regulating liquidity, and supporting economic stability. The research activity encouraged the student to develop an understanding of the relationship between central bank policies and the Indian economy.

Conclusion

Student research and paper presentation activities promote academic inquiry, independent learning, and analytical thinking. The participation of students in conferences helps strengthen their research skills and encourages them to engage with contemporary developments in economics, banking, and finance.
